*Putting you in the centre*

# Jan Bach Maskinfabrik ApS

*Help to ensure innovative and flexible production*

Jan Bach Maskinfabrik is the gateway to the latest technology on the market, with 3, 4 and 5-axis CNC milling, and plenty of experience in the production of complex components.

**At Jan Bach Maskinfabrik, you are always in good hands**  
Regardless of whether you require one-off production, or an extended series, you are in good hands with our well-trained and skilled personnel. Furthermore, our production engineers can assist your own design department with advice and guidance on such aspects as optimal production methods.

# Competencies

*We keep you updated*

As a customer at Jan Bach Maskinfabrik, you will be kept updated and involved. That's our way of ensuring that whichever solution we arrive at will fulfil your requirements and expectations.

## **Access to:**

- Modern machinery and the latest technology
- Advanced CNC milling and turning
- Experienced and committed personnel who speak your language
- Advice and guidance based on your needs

We always have a wide range of aluminium, steel, stainless steel and plastic in stock, enabling us to fulfil orders with tight deadlines.

## **Make use of our expertise and know-how**

Regardless of whether you require one-off or long-term serial production, our highly trained and skilled personnel will ensure you get the best. If you are planning to expand your product range, we will also be happy to put our expertise and know-how at your disposal – to give you the best and most economic solution based on your needs. Because your needs are what it's all about for us, and why Jan Bach Maskinfabrik puts you in the centre.
